Returned Parts

Written explanation of reason for return must accompany parts, including invoice number of original shipment. Shipping charges on returned parts must be prepaid or the shipment will be refused.

Order Shortages

Check shipment against delivery slip immediately. All claims for any shortages should be made within 3 days after order receipt.

Credit Policy

Parts will be shipped on open account, net 30 days, to Wipaire-approved credit customers only. A balance due over 60 days will result in no shipments. Wipaire, Inc reserves the right to send any order Collect on Delivery.

USING THIS PARTS MANUAL

COVERAGE

This parts manual shows components below the top deck, the hydraulic handle in the aircraft, and the hydraulic pumps located in the aircraft. For struts and other components installed above the top deck, contact Wipaire or installation drawings included with a new modification.

NOMENCLATURE SYSTEM

This parts manual uses an alphanumeric system for identifying sub assemblies and sub components. The initial digit is the parent part in the assembly and the alphabetic letters after signify a sub assembly component. To order an entire assembly, order the part number associated with the first digit of the individual components.

However, if a sub assembly required more space than allowed in the initial figure, then the sub assembly will receive its own figure on a later page.

See image below and parts list on proceeding page for reference.

NOTE: Images shown in this section are for reference only and may not depict actual components specific to your product.

FIGURE 1-1: NOMENCLATURE SYSTEM IMAGE

Signifies Item is not
sold individually.

For this example, the
Sub Assembly Item 1
must be purchased,
as all sub components
are not sold separately.

Parent Assembly: Contains
all shown in associated
figure and all items in the
associated parts list.

Sub Assembly: Item 1
not called out in figure,
but are comprised of
sub components 1a, 1b,
and 1c. Order Item 1
to receive all items that
begin with the digit 1.

8A08000-079 WATER RUDDER ASSEMBLY

Sub Components:
Items 1a, 1b, and
1c are called out
in figure. All sub
components that
share the same first
digit are included in
the Parent Assembly
Item 1. Sub
components can be
ordered separately
unless noted.

SIMILAR APPEARANCE PARTS

Items of the same part number that appear in the same vicinity in the figures will generally not be called out more than once unless needed for clarity. In the following image it is to be assumed that all screws shown are item number 3, all washers shown will be item 4, and all nuts shown will be item 5. Only if further clarity is needed, more or all parts will be given an item number.

NOTE: Images shown in this section are for reference only and may not depict actual components specific to your product.

DISTINGUISHING LEFT AND RIGHT

All references in this manual to LEFT and RIGHT are from the perspective of the pilot's seat facing forward with the floats fully installed and ready for floatplane operation.

If a components or assembly is specific to the left or right float only, the description will have "Left or Right Float" in the description.

If "left" or "right" only is in the description of a components, it is referring to the position of the components in reference to an assembly in the float.

SHADED COMPONENTS

Shaded components that have a Bill of Material number attached to them are components that may be purchased and are shaded to show other components more clearly.

Shaded components that do not have a Bill of Material number attached to them are shown for positional reference only of the other components and are not listed in the table of that section.
